DETAILED ACTION

Allowable Subject Matter

Claim 8-10 and 12-22 are allowed

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 8-10, 16-22, the prior art of record fails to disclose or suggest a structure of a PWM controller comprising "the output stage further comprises a third transistor, wherein the third transistor is coupled to receive the low-side signal and wherein the third transistor is configured to turn of the high-side transistor when the low-side signal is asserted" in combination with the rest of the limitations of the claim(s).

Claims 12-15 are allowed over prior art because none of the prior art disclosed or suggested showing the particular structure and/or operation recited in these claims namely:

Claims 12-15 call for, among others, "a third transistor (Q1) coupled between the second input and the first transistor".
